Brian's team helped us design and build our home on time and on budget. Years after completion they did a renovation and expansion. The experience was professional and enjoyable.

Exterior and Lighting

Outdoor Living Areas

Harland Homes not only offers new construction but also renovations and remodeling. Brian knows that projects involving renovation or remodeling require not just flexibility in order to respond to unexpected issues that arise, but also a clear and specific plan that involves feedback from the homeowner; and every detail has been agreed upon by all parties. Planning also includes the collection of any projected data and costs for the project, at which point the plan will be revised and given consent before continuing with renovations. You can rest assured your renovation will be completed with an unsurpassed level of excellence.
